1. WHAT IS TO TRANSFER A DOMAIN NAME?

The transfer of a domain name is the process by which an Accredited Registrar requests the management of a domain name that is currently not managed by them.

The user must provide to the Accredited Registrar who wishes to transfer the domain name to the authorization code (AuthCode) that the ACP (Administrative Contact Person) has received after requesting it from their actual Accredited Registrar, or from the Registry in the case of End Users.

Once the new Accredited Registrar has initiated the request for the domain name transfer stating the corresponding valid AuthCode, the ACP will receive a notification by email in which there will be a link from which the transfer can be accepted or cancelled.

In the event that the ACP does not accept or cancel the domain name transfer, the transfer request will be automatically cancelled by the system after 10 days, remaining the domain in the same state it was in before the transfer request was launched.

This operation can be requested at any time of the domain name's life cycle.

2. HOW TO REQUEST A DOMAIN NAME TRANSFER?

In order to initiate a domain name transfer process, it is necessary to contact the current Accredited Registrar (or the Registry in the case of End Users) and request the generation of an authorization code (AuthCode) with which the transfer process will be validated, which will be sent to the domain name ACP (Administrative Contact Person). The AuthCode will consist of between 6 and 16 alphanumeric characters.

Estimado Sr./Sra.,

En fecha 27 de agosto de 2024, el Registro de Dominios bajo ".es" ha tenido constancia de su intención de realizar una transferencia del dominio "prueba466-valido-veintiseis.es", asignado a favor de Iago UFC y actualmente gestionado por el Agente Registrador AgentelagoDeloitte.

A los efectos de llevar a cabo dicha transferencia de forma efectiva, en su condición de Persona de Contacto Administrativo del dominio prueba466-valido-veintiseis.es, es necesario que facilite el código que le detallamos a continuación al Agente Registrador que gestionará el dominio a partir de ese momento.

AuthCode: ERrjklJagrqZ

Para tal fin dispone hasta el próximo 6 de septiembre de 2024 incluido. Transcurrido el mismo sin haberse recibido respuesta, dicho código caducará.

Atentamente,
